

OPERATING PROFILES ZX, TX, SB40

INTELLIGENT ENERGY MANAGEMENT SYSTEM

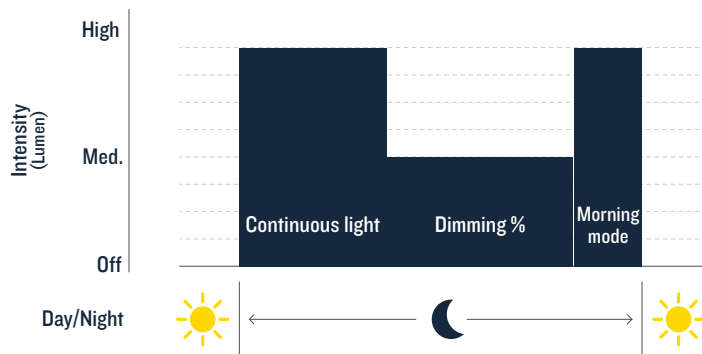

OPERATING PROFILE (DUSK 100%, OFF)

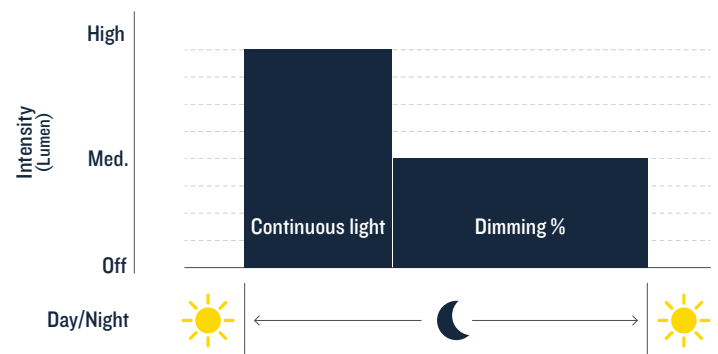

OPERATING PROFILE (DUSK 100%, OFF, MORNING 100%)

OPERATING PROFILE (DUSK 100%, DIMMED, MORNING 100%)

OPERATING PROFILE (DUSK 100%, DIMMED)

Our solar powered lighting systems are designed to run throughout the night, dim or shut off completely when full power is not needed, and reactivate before sunrise. Our operating profiles are very flexible and adjustable according to your present or future needs.

Dimming can conserve energy and maximize light output at peak hours. This intelligent energy management system can greatly reduce the size and cost of the solar lighting system.

FEATURES & BENEFITS

- Dimming allows longer operating time per night;
- Dimming allows higher light output during peak hours;
- Adjustable dimming % and operating profile thanks to a remote control (sold separately).
- Continuous light output with dual timer; independent sunset and sunrise timers;
- Automatic activation at sunset;
- Automatic activation before sunrise if desired with the "Morning mode";
